SUMMARY

I have a genuine long-term interest in programming and development, building on initial coding courses within my degree subject by recently graduating from a coding Traineeship as a full-stack developer. I am looking forward to establishing a career in the field where I can prove myself as an asset due to a strong attention to detail, keen problem-solving skills, strong work ethic and excellent customer service, communication skills, organisation, teamwork, and leadership skills – honed by a range of experience in hospitality, and university sports club roles. I am extremely flexible as to location, and a confident world-wide traveller.

CAREER HISTORY

Pierhead Water sports – Seasonal Worker

- Organised equipment hire
- Safety boat driving
- General management of office and equipment
- Safety briefings and water sports guidance

Hospitality roles

- Bar Staff
- Barista
